LEARN ABOUT INNOVATIVE TECHNOLOGY FUTURES

This unique Sun event is designed specifically for the academic community, including undergraduate and graduate students, faculty and administrative staff. This **FREE** event is perfect for students and programmers interested in learning about the latest technologies that are driving mobile computing, open source projects, security, web services and more.

CONNECT EVERYTHING

Network with peers and Sun experts to learn how new technologies are being used across a range of industries.

POSITION YOURSELF FOR THE SOFTWARE FUTURE

Join us in the afternoon for an in-depth code camp on **DTrace**. **DTrace** is a comprehensive dynamic tracing framework for the Solaris Operating Environment. **DTrace** provides a powerful way to permit developers to concisely answer interesting questions about the behavior of their programs and the underlying operating system.

Agenda – College of Engineering, Woz Lounge, Soda Hall Fourth Floor

9:30 – 10:00 am	Registration
10:00 – 10:20 am	Innovations @ Sun
10:30 – 11:15 am	Java Now and The Future
11:25 – 12:10 pm	Software Evolution: OpenSolaris™
12:15 – 1:00 pm	Mobility and Wireless Development with Java™ME
